INTENSE TOXIN BINDING PREMIX ENRICHED WITH YEAST, ACTIVATED CARBON FOR RUMINANT AND POULTRY

INTENDED USE: The activated carbon in its content, helps binding mycotoxins such as aflatoxins, ochratoxin a, T-2 toxin, deoxynivalenol, zearalenone, nivalenol in aqueous media. It is used to be excreted with feces by binding the toxins in concentrate feed and coarse fodder that used for feeding ruminant animals and poultry. By binding toxins, it protects animals against toxin poisoning. Yield losses due to toxins are prevented.

USAGE: It is used by being mixed to the daily feed of animals (per animal).
